

Goldtouch Mousing Platform

The organically-shaped mouse pad (mousing platform) with its beveled edges and sloped surface keeps the arm and hand in a more natural, more relaxed position than a conventional flat mouse pad or desktop mat.

Made of stress-dispersing gel, the mousing platform gives under pressure to relieve strain. The lycra cover provides excellent trackability. It helps you attain neutral wrist postures.

FEATURES	MODEL NUMBERS
<ul style="list-style-type: none"> • Supports the wrist and helps you attain a neutral wrist posture. • Unique 3D shape distributes pressure evenly, and helps avoid unwanted pressure points in vulnerable soft tissue. • Comforting Gel structure disperses stress — allows you to relax your hand, wrist and arm. • Negative tilt on the mousing surface straightens the wrist. • Positive slope on the front surface helps protect your arm from hard desk surfaces. • Gentle 3D curves cater to a greater range of desk and height variance. 	<p>GT6-0003 - Blue GT6-0017 - Black</p> <div style="text-align: center;">  <p>Available in Black</p> </div>
