

**ReGeneration by Knoll®**

## Be true to form. Introducing ReGeneration by Knoll®

**An everyday chair that simply supports the way you work.**

The newest member of the Generation by Knoll® family of chairs designed by Formway Design, ReGeneration by Knoll allows you to sit how you want for everyday work. Innovative in its simplicity, ReGeneration minimizes materials and components. Its straightforward design leverages flexible and durable materials that respond to your movements, providing comfort and support throughout the day.

With an eye toward conserving resources, ReGeneration uses recycled, rapidly-renewable and biobased materials and redefines efficiency in both sustainability and value. It's a chair you can feel good about.

A simple solution for a complex world. ReGeneration delivers flexibility with streamlined form and features. The slim profile of its back frame serves the purposes of aesthetics, structure and comfort, encapsulating the same high performance elastomer that wraps the frameless Generation by Knoll chair's Flex Back, second from left, in Olive.

## Put simplicity to work.

**ReGeneration gives you the comfort and support you need as you move about your day without interrupting your work flow.**

With simple, minimal adjustments and responsive performance, ReGeneration supports the body's natural tendency to move, promoting comfort and freedom of movement with three key features.

### **Slim profile back with contoured frame**

- Follows the curves of your shoulders, back and lumbar
- Flex Back Net, made of a high performance elastomer, cradles your back, providing integral lumbar support
- Optional upholstered back provides the comfort of foam and fabric over the Flex Back Net

### **Design for 270 degrees of sitting**

- Flex Seat responds to shifting postures with three sides of seat edge flex
- Arms provide clearance for your legs and Continuous Lumbar when side sitting

### **Responsive performance**

- Weight-compensated, adjustment-free Dynamic Suspension Control uses your seated weight as a counterbalance for a synchronized recline
- Recline resistance feature allows you to select greater upright support or full recline

**It's all in the family.** For focused, shared and team work, the Generation family of chairs supports the way you work today. ReGeneration at table with Pebble Flex Back Net and Generation Fabric, Storm, seat; Generation at desk in Light finish with Storm Flex Back Net and Generation Fabric, Storm, seat; MultiGeneration by Knoll® hybrid chair in Off White shell color, Generation Fabric, Pebble, seat and chrome frame finish, shown with Antenna® Workspaces and Template™ storage system.

## Take a natural approach.

ReGeneration aims to do more with less — paring down without sacrificing key performance.

This level of efficiency required re-examining every detail of the chair and innovating in the use of sustainable materials.

- With just seven major parts and weighing only 28 pounds, ReGeneration is lightweight, visually and physically.
- The ReGeneration frame is made using postconsumer recycled plastic bottles.
- Introducing rapidly-renewable materials to the seating category, the high performance elastomer Flex Back Net uses material derived from corn byproducts, and the biobased upholstery foam includes content derived from soy.

All of this adds up to a uniquely sustainable chair that can contribute to achieving up to four LEED® credits.

**Simplify matters.** While Ludwig Mies van der Rohe's maxim "less is more" certainly applies to ReGeneration, the chair also proves, when it comes to manufacturing efficient structures, less can also be less: less material, fewer parts, less weight, lower cost and a smaller overall carbon footprint.

## Flex Back Net colors

03 Pebble    06 Espresso    09 Onyx    10 Olive

## Generation Fabric colors

01 Storm    03 Pebble    04 Desert    05 Lemongrass    06 Espresso

07 Firecracker    08 Bluemarine    09 Onyx    10 Olive

Also available in 100+ KnollTextiles fabrics and Spinneybeck® leathers

## Base options

Dark plastic    Polished aluminum

## Complement your space.

While simplicity is fundamental, ReGeneration does offer choice in materials.

With a materials and upholstery palette designed to complement today's workplace, ReGeneration is available in four Flex Back Net colors, in both cool and warm neutrals. The scope of line is slated to include fully upholstered and high task models.
