

SUPERFOAM[®]

STRAX[®]
FLOOR MATTING

SUPER[®] FOAM

Superfoam[®] is an extremely lightweight anti-fatigue mat designed especially for ease of handling and ergonomic comfort. Made from a closed cell PVC Nitrile foam blend Superfoam[®] does not absorb liquids and is highly resistant to greases, oils, animal & vegetable fats. This allows it to be used in areas where occasional overspray and dripping occur such as dishwashing stations and bar areas. And because Superfoam[®] is lightweight, it is the perfect mat for use in areas where mats are regularly moved for cleaning like cooking lines, service counters, and food prep stations.

Due to a unique top surface design that increases traction and the extreme comfort of its anti-fatigue properties, Superfoam[®] is often used in environments where traditionally much heavier and bulkier mats are used such as cashier stations, assembly lines, workstations, laboratories, and even home workshops.

Beveled edges on all four sides (including rolls and custom lengths) reduce trip hazards and eases traffic on to and off of the mat.

Superfoam[®] also comes in a perforated version with drainage holes to facilitate the removal of liquids and debris from the work area.

Superfoam[®] is easy to clean with a mild degreaser and hose spray and is even dishwasher safe.

SPECIFICATIONS:

Made from a PVC Nitrile foam blend for the highest degree of resistance to chemicals, cutting fluids, animal & vegetable fats, oils and greases.
