

STANDING DESK FOOTREST

STAND

SIT

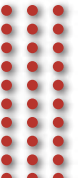

BE HEALTHY

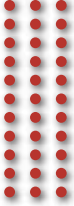

Whether you have existing stand capable desks or you are considering them, our Patented Dual Level Footrest is the absolute key to standing comfort. Studies have shown that less time spent sitting can add years to your life. In ergonomic studies evaluating standing time for users with and without footrests, those with them stood on average 30% longer throughout the day.

Our design utilizes multiple depths and two heights to support the user's feet while sitting at a stool or standing. The chrome plated option ensures lasting durability and easy maintenance or you can select the powder coated black option for a less bold statement.

Be careful – others around you will develop a bad case of “desk envy” once you are properly outfitted!

MAKE STANDING A COMFORTABLE ALTERNATIVE TO SITTING

Footrest Height: 7" and 11" (adj. depth and 24" wide)

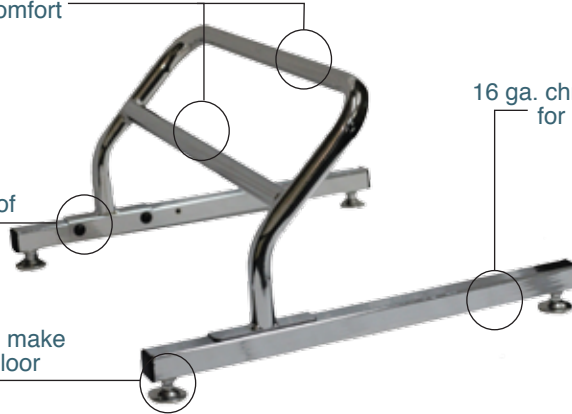

Chrome Model # FC12

Black Powder Coated Model # FB12

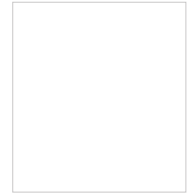

Ergonomic design with dual-depth, dual height footrests for all day comfort

Easy assembly with multiple depth settings to accommodate all types of desks

Non-skid, Non-mar leveling pads make this footrest comfortable on any floor surface

16 ga. chrome (or optional black) steel for solid, long-lasting good looks
