

UPLIFT DESK®

DESKTOP

certified for low chemical emissions
UL.COM/GG - UL2818

Our black and white UPLIFT Eco Corner desktops are GREENGUARD-Certified for health and safety for indoor use, so you don't need to worry about chemical emissions such as the formaldehyde found in lower quality materials. GREENGUARD-Certification is your assurance that our products are sustainable and safe.

Tops are made from 100% recycled wood composite and powder coated for a durable, seamless finish. These MDF tops are non-toxic, with no heavy metals, solvents, VOCs, or HAPs. The recycled wood core is certified by the Sustainable Forestry Initiative and meets California Air & Resource Board requirements. The surface qualifies for LEED credits, and up to 98% of powder-coat overspray is reclaimed, reducing waste.

Top size is 72" x 47" x $\frac{3}{4}$ " thick, with the extension on the left or right. Tops are one solid piece with smooth edges and a sloping center cut-out.
