

# Keyboard Trays by UPLIFT Desk

## Comparison Chart

KBT006, KBT007, KBT008

### Big Standard Keyboard Tray

The Big Standard Keyboard Tray System positions your keyboard height, depth, and angle for optimal ergonomics, resulting in maximum comfort and productivity. A 27" keyboard platform is large enough to fit your mouse and keyboard side-by-side securely. Locating your keyboard and mouse closer to your lap height is better for ergonomics.

### Big Ultra-Thin Keyboard Tray

Big Ultra-Thin Keyboard Tray Systems helps you achieve your ideal ergonomic position. Customize the location of your keyboard's height, depth, and angle. Platform tilt angle was designed to move the keyboard away from your body to ensure an ergonomically correct typing posture. Our premium, ultra-thin .25" thick phenolic keyboard tray includes a 27" wide platform and is large enough to fit your mouse and keyboard on the same surface

### Switch Ultra-Thin Keyboard Tray

The dual platform Switch Ultra-Thin Keyboard Tray System keeps arms, hands, and wrists in comfortable positions for typing and mousing. Featuring an 8" height adjustment range, the tray allows for tilt adjustments from 10° positive to 20° negative. A detachable mouse platform can be moved to either side for ambidextrous mousing. The Switch has 360° of swivel for easy under-desk storage and comes with a removable wrist rest and mousepad for a complete ergonomic setup.
