\* All measurements taken with BIFMA Chair Measuring Device using the Universal Measurement Procedure which has a measurement uncertainty of  $\pm 5\%$

## Compliance:

ANSI / BIFMA X5.1 : 2002 (structural)

GPD-6 (Canadian structural standard)

Cal 117 (fire retardancy)

Cal 133 approved standard for non-upholstered models; Cal 133 with approved FR upholstery for upholstered seat models (fire retardancy)

MultiGeneration by Knoll has been tested and is approved for use by individuals weighing up to 300 lbs.

## Stacking Instructions

Stacking chairs—with or without arms and with or without casters— stack up to 6 units high on the floor.

To stack chairs, place the rear legs of the top chair in front of the rear legs of the bottom chair and set the top chair down on the bottom chair.

To transport a stack of chairs, use the MultiGeneration by Knoll dolly.

Stacking chairs stack up to 10 units high on the dolly.

The dolly stacked with 10 non-upholstered stacking chairs measures 53.5" high and with 10 upholstered seat stacking chairs, measures 55" high .

## Non-upholstered chairs

Non-upholstered stacking chairs feature bumpers to protect the seat finish of the chair below and prevent chairs from slipping. Do not stack non-upholstered chairs on upholstered chairs, as the bumpers could damage the upholstery of the chair below.

## Upholstered chairs

Upholstered stacking chairs feature a stacking shield on the underside of the seat to protect the upholstery of the chair below. Do not stack upholstered chairs on non-upholstered chairs, as the stacking shield could damage the seat finish of the chair below.

## Hybrid chairs

Hybrid chairs do not stack.

## MultiGeneration Stacking Chair Ganging Instructions

The MultiGeneration ganging clip adjoins the back legs of the armless stacking chairs. Position the chairs side-by-side and snap the ganging device onto the chair legs just above the top of the glides. Arm and armless chairs can be ganged if alternated, but armed chairs cannot be ganged side-by-side.
