Neutral Posture eXtra SMall

Big Ergonomics in a
Small Chair

"In designing the new XSM Series, we took into account the smaller body sizes and proportions that, until now, have been neglected in seated ergonomic design. As our population continues to diversify, the needs of the seated workforce will also continue to diversify. Neutral Posture will continue to be at the forefront of ergonomic design until there is a solution for every body!"

Jerome J. Congleton PhD, PE, CPE
