DCS™ TECHNOLOGY

DOUBLE COMFORT
SEATING TECHNOLOGY

Years of research and development have resulted in DCS Technology, the reality of an Office Master vision.

Feel the contoured seat conforming to your unique shape. From the moment your body makes contact with the chair a molded, outer layer of memory foam creates a unique print of you, an underlying base of molded, high resilience, polyurethane foam is providing stability in the specific places where it is needed.

DCS Technology is the perfect combination of softness and support, a remarkable seating experience that is sure to set the standard by which all future seat cushions will be judged.
