

Chair Mat with Standing Cushion

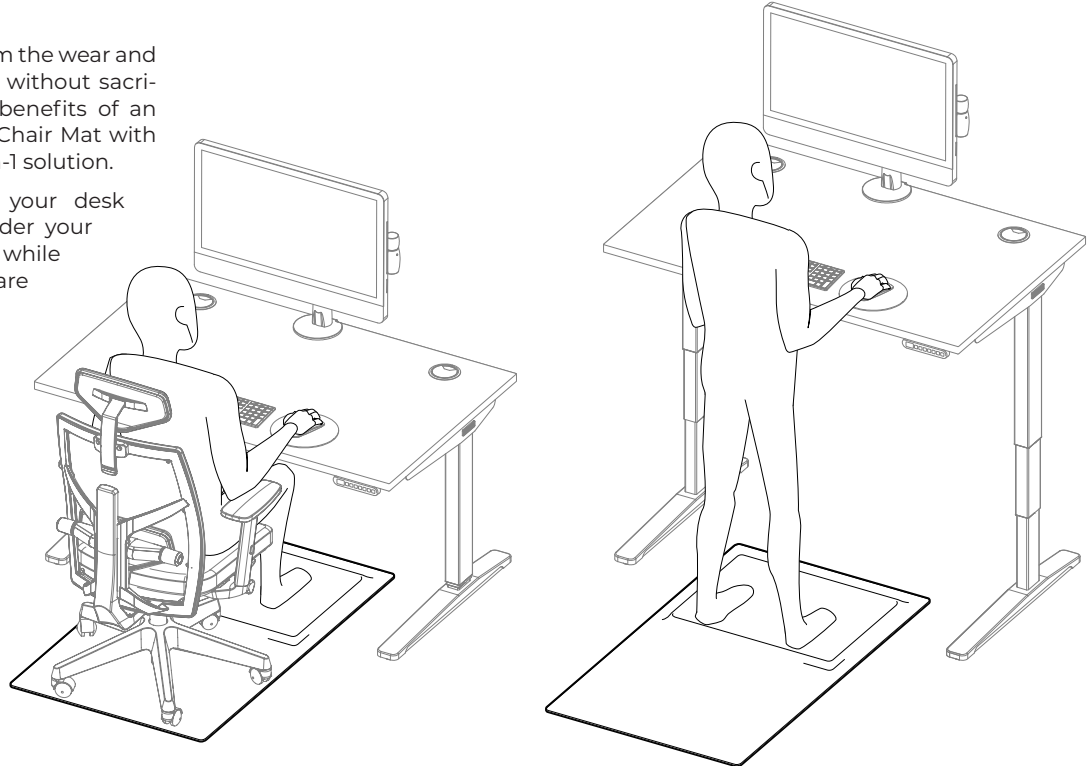

SKU: MAT015

UPLIFT DESK®

Wanting to protect your floor from the wear and tear caused by your office chair without sacrificing the comfort and health benefits of an anti-fatigue standing mat? The Chair Mat with Standing Cushion provides a 2-in-1 solution.

Simply place the mat under your desk so the cushioned portion is under your desk. It will serve as a foot rest while you're sitting. Then when you are ready to stand and work, roll your chair out of the way, and pull the mat out to position the cushioned portion where you will be standing.

Note: If you'd rather not move the mat between as you move between sitting and standing, we recommend keeping the mat in the position most optimal for standing with the cushioned portion visible. The cushion is durable enough to withstand the movement of your chair wheels as your transition between postures.
