

## GRAVITY™ balans®

Design: Peter Opsvik

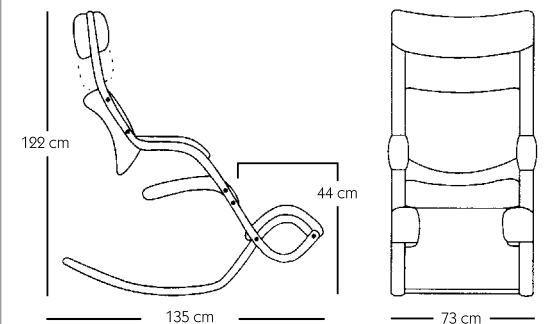

The ultimate recliner for both being active and relaxed. Gravity™ balans® is a highly unusual piece of furniture. The recliner encourages good posture when sitting or relaxing and is probably the closest you will ever get to achieving zero gravity.

Customer's own fabric: 2,10 x 1,40 m

Leather: 3,7 m<sup>2</sup>

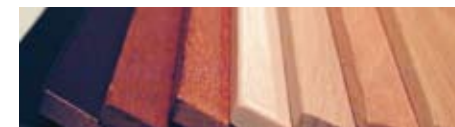

### Extra

Soft-tape – black or natural – for protecting wooden floors and for more comfort on tiled floors. Order separately.

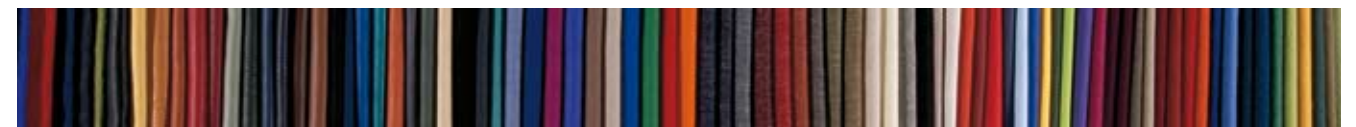

### Respecting the environment:

Using environmentally friendly materials and methods is a major priority for Variér®. We also attach importance to ensuring that the production methods are environmentally friendly.

### Materials:

We use wood from farmed sources harvested using principles of sustainability. All the beech and oak we use comes from Europe. The walnut comes from North America.

### Fabrics and leathers:

We offer fabrics of high wear resistance and classic appearance supplied by acclaimed European specialists (Kvadrat, Innvik, Gabriel) in more than 200 colours. We offer high quality semi-aniline leathers from European leather merchants applying eco-friendly production methods when developing raw hide into furnishings.

Cushion: Polyurethane foam

### Guarantee 7 years/5 years .

Variér® offers an extended 7 years guarantee on all wooden parts and 5 years on mechanical parts to customers who register their products in our product database. Variér's guarantee only covers manufacturing defects and does not include misuse, normal wear and tear and defects caused by exposure to sunlight. The guarantee will not apply if the customer fails to tighten screws as recommended and this results in damage to the piece of furniture.

VARIÉR®  
INTELLIGENT SITTING

We are created  
to move not  
to sit still

This also reflects our sitting philosophy. We have always focused on developing chairs that by letting you move provide well-being. When you move, you feel good. Both physically and mentally. As long as your body has a choice, it will choose movement over inactivity. Also when sitting.

That's why we have made it our mission to develop chairs based on the movement philosophy. These unique sitting solutions encourages dynamic and active sitting positions, which in turn provide maximum comfort and well-being while seated.

## GRAVITY™ balans®

Probably the closest you'll ever get to zero gravity. Gravity™ balans® is a highly unusual piece of furniture. It's a timeless classic and offers you an almost weightless feeling while seated. It provides the ultimate in comfort and is relaxing for the mind, spirit and body.

"It is not a chair, it is a way of life," says Peter Opsvik.

Traditionally, people have one kind of chair for resting and another kind for performing activities (eating, working etc). Sitting in a Gravity™ balans® allows you to alternate between different body postures. You can easily lean forward to reach for papers, a coffee or just to talk, or you can simply lean back and rest. In the most reclined position your feet are placed higher than your head – a position to provide ultimate relaxation.

In the first position, the knees lean on the leg cushions giving the body an ideal position for working at a desk.

In the second sitting position you sit back as in any comfortable chair. The leg cushions are perfect support your legs.

Open solution gives freedom for movement and optimal comfort and support for the back.

Resting in the fourth position is so comfortable, you'll probably want a quick nap! Your legs are lifted high, and the circulation gets a long deserved rest.

Adjustable neck cushion gives comfortable support. Easy to adjust for individual needs.

PROBABLY THE CLOSEST YOU'LL EVER GET TO ZERO GRAVITY
