

## SIERRA HX ELECTRIC

adjustable height workcenters

### RAISE THE BAR ON WORKCENTER COMFORT

The Sierra HX is the most innovative adjustable height workcenter for the professional workplace. The standard crossbar has been eliminated to allow maximum leg clearance. An innovative frame structure under the worksurface provides unmatched stability and room to attach a CPU holder, keyboard platform with lots of space to position your mobile pedestal.

Sierra HX features our beautiful Silhouette Collection of worksurfaces. These sleek tops are whisper thin at just ½", use GREENGUARD® certified material, and are available in a variety of edge treatments.

Sierra HX Electric workcenters will lift your spirits along with your essential worktools. Quiet motors provide over 175 pounds of lifting force per leg, so no matter how heavy your workload, the Sierra HX Electric is there to support you.

Let work  
come to Life.™

Workrite  
ergonomics®
